Making Physical Education Safe

Some Ways to Inform:
- Accurate demonstrations
- Visual guidance
- Reminding about procedures, routines, and preparation
- Notices, signs, and barriers where risks exist

Some Ways to Prevent:
- Clear instructions and explanations
- Protective equipment
- Putting policy and procedures into practice
- Anticipating what might happen
- Consistent application of rules
- Checking and maintaining equipment

Some Ways to Educate:
- Teaching safety through...
- Teaching safely through...
- Sufficient space to work
- Teaching techniques, skills, and progressions
- How to use equipment and facilities safely
- Giving students responsibility for safety

Informing about hazards and risks
Preventing injury through good organisation
Educating students about recognising risk and how to work safely

Some ways to prevent:
- Wearing correct kit and footwear
- What do you say you do?
- Do you do what you say you do?
- Consistent application of rules

Educating:
- Developing observation and analysis skills
- How to use equipment and facilities safely
- Giving students responsibility for safety

Informing:
- What do you say you do?
- Do you do what you say you do?

Educating:
- Developing observation and analysis skills
- How to use equipment and facilities safely
- Giving students responsibility for safety

How to use equipment and facilities safely
Developing observation and analysis skills
Giving students responsibility for safety
